What's New In?

Create a bootable USB drive with the help of the WinUSB tool. Windows 8/8.1/10/7/8.1/2012/8/8.1 WinUSB is a tool that will help you create a Windows 8/8.1/10 bootable USB drive. It is available in two versions: the free Universal Edition that can be used on Windows XP/Vista/7/8/8.1/2012/8/8.1 and the commercial Enterprise Edition that is accessible to Windows 2000/XP/Vista/2003/2008/2012/8/8.1. When you launch the tool, you will see the Windows 8/8.1/10 system window. To create the bootable USB drive, you just need to click on the "Make bootable USB" option. You will be able to create several types of bootable drives. For instance, you can create USB drives with Windows installer media, with Windows ISO files, with Android APK files and with Android APK package. The tool will scan your computer, then display the list of the installed packages that can be found on your computer. You can also select any file to create a bootable drive. The file format will be automatically converted into a bootable drive. Once the drive is done, you will see it in the list of bootable drives. You can click on it to open it or copy it to the clipboard and paste it elsewhere. For more details, check out the official WinUSB website. Description: Tenorshare Video Converter Ultimate is a powerful and efficient video converter that enables you to convert any video files to any format you desire. The main functionality of the application lies in

its ability to convert between various video file formats. It supports converting videos between popular formats such as AVI, MPEG, FLV, WMV, MOV, RMVB, MP4, RM, SWF, MP3, WAV, WMA, AAC, AC3, M4A, MP3, M4B, M4A, M4R, M4B, MP2, MPA, 3GP, AVI, WMV, DIVX, MOV, etc. One of the interesting features of Tenorshare Video Converter Ultimate is the ability to extract subtitles from videos to enable you to watch your favorite movies on TV with the sound of your PC or laptop speakers. Apart from the video conversion function, Tenorshare Video Converter Ultimate offers you a set of video tools that allow you to create videos from various sources. For instance, you can take the picture you have taken with your webcam, or shoot videos with your camcorder and then use the video editing and transforming tools to optimize and convert the source video into a format you like. With
