also letting you choose a 'Post-encode Action', specifically 'Shutdown PC', 'Log Off' or 'Close Application', once the download task completes. Clean and novice-friendly GUI. Appearance-wise, the application is very simple to understand and handle, with little left to the imagination, thanks to its straightforward functions and features. Download YouTube videos on the fly. The program is capable of grabbing videos individually or in batch, enabling you to input the link for one or several YouTube entries. At the same time, it is capable of saving all the items from an indicated playlist, thus being able to work with countless files simultaneously and saving you the trouble of adding links one by one. By default, GiliSoft Youtube Video Downloader exports all files to the best available quality, but you can choose a different format and visual quality from a dedicated menu, prior to starting the process. It includes MP4, M4A, 3GP, FLV, WebM and others, even supporting HD quality. However, you do not have the option of extracting only the audio stream. The tool gives you the possibility of modifying the destination folder for the saved files, while also letting you choose a 'Post-encode Action', specifically 'Shutdown PC', 'Log Off' or 'Close Application', once the download task completes.
