Pocket Kingdom is the most beautifully-rendered 3D game ever made! Enter a world of imagination and experience with a delicate mixture of dynamic management and tactical strategy. Storyline: You take on the role of a wizard, who uses his magical powers to explore, create, and even rule over a fantasy kingdom. With a loyal hand-crafted cast of characters at your side, you journey deep into a richly-detailed fantasy world. Players begin the game with an uninhabited "family" castle town, leaving the bare minimum buildings in place but open to any player who joins the community. The game offers a number of gameplay options, including turn-based battles, talk-overs, and an integrated speech-over-text chat system. Features: Turn-based battle system with attack, defense, status, map, and action points Two types of turns, with traditional order being to the left and RTS order being to the right Easy battle point counts Minimal menu Designed for an easy-to-learn, easy-to-play style Choice of characters: Wizard as the player Princess as the hero Upper Town: Advanced tools Endless dungeons Excellent chart of potential alliances with other players' characters Notifications, mail, and your town's reserves of magic Excellent chart of potential alliances with other players' characters Upper Town: Indestructible Upper Town walls Strategic overview of each player's army Beautiful 2D animation Low-magic frontiers Escape to the sky using the airship 100+ characters in each town Upper Town: The player's airship will take you to any town in the kingdom The player is the captain of the airship and can sell his or her crew to other players The player's airship is the most valuable item in the kingdom There are a few early airship upgrades on the path to the airship Upper Town: Unlimited towns Randomized towns Militant enemies Militant Town: Nonstop battle with characters and enemies Monsters Treasure Upper Town: Marketplace Militant Town:

Notices -Licensed and reviewed by The Dice Tower staff-Ratings: 5 / 5 Dice Tower Core Rating: 5 / 5 Details A very solid expansion for Dominion. I really appreciate how they added very helpful underhanded actions like doubling down on a card, or taking the extra time to read the action cards. The board additions are simple and very helpful in dealing with multiple simultaneous actions. In particular, the new lower cost action cards are quite useful. I can think of a number of times that I would have liked to have a lower cost underhanded action, and this expansion gave me just what I was looking for. My favorite additions to the game are the doubler cards. I am definitely going to be using these more in the future. In addition to the added value of having duplicate copies of your pieces, I like the added intrigue in the game. If one of my own pieces is being played, and I need to defeat the opponent, I would rather have the chance of really underhanded action, such as a double to get one card played, instead of the opponent drawing a couple extra cards or taking a couple of tricks. -Threat levels are built into the cards themselves. If you play a card that is not underhanded, you can choose how hard it is to get rid of the threat level. What makes it more fun is that when your threat level is high, the low level of cards still increases the value of the threat cards. -One more thing that is quite fun is that each card has an inherent theme. For example, a common that is painted with a snake or some other predator symbol would be more likely to hurt you than others. The collectors of Intrigue are certainly going to enjoy these, as the rat and mouse symbols are quite popular. The base set of Intrigue is solid, but does have a number of its own problems. The most glaring one is the trap cards. There are a number of trap cards that can remove a card from the board, as well as from your deck. The board is a bit more complex than the previous sets, and traps are very helpful to remove cards that you don't want to play, but they really detracted from the board in my opinion. The traps are also not balanced. Many are too expensive, and others have too many abilities, as you would expect with a card that can be used in any phase. In general, the Intrigue expansion

! Take a picture of how you want your photos to look when done. Don't be shy and tell the photographer exactly what you want your photos to look like. Having an artistic eye for photography is a great help - they can probably provide them even before you know it! With such large amounts of work, it takes time to get done, and most importantly, to grow in the company. Once fully grown, a Neopet will have gained the title of "a newb" and of being the older "brother" to other neopets. It will take a while to learn the tricks and know how of the group, and sometimes even after years of belonging to a group that you still might be an outsider. Why Become A Newb? For the first year, you are the most interesting newb! Also, others have already gone through the potentially confusing newbery process, and you can now take advantage of any of their insights. Sure, you were a newb once. Remember? Before you start off, just take the time to read around, and start slowly when people finally become relaxed and comfortable with the level of newb info available. Be gentle. Unless, of course, you troll, then it's best to be intimidating and cold. When a n00b tells you something, do one of the following: Report to the group what you learned Wait until they are ready to let you in Ignore them What does a nightlife n00b look like? Right off the bat, it's far easier to stay in the daytime, because your lifestyle is different. If you grew up for example in a family of five, you might have five duties, and two meals a day: Appetizer in the morning Two main dishes or two side dishes Sandwich or dessert Evening snack Lunch on the way to the store Food for the week is in your backpack and goes with you. What about the leisurely evening scene? A leisurely evening scene can be defined by two things: A sheltered-yet-interactive atmosphere (or even no-interaction alltogether) An abundant supply of material (books, walks, movies, etc.) Examples of these activities: Reading books Playing board games Playing cards Chat with an invisible friend Left to your own devices,
